Critical Intelligence Problems Committee

16 July 1986  
DDW-174 & 175

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--16 July 1986

CIPC Organizational Activities

- 25X1 ● The CIPC meeting scheduled for 21 July has been cancelled and tentatively rescheduled for 28 July 1986, because the [redacted] Report is not ready.
- 25X1 - [redacted] reported that not only has our report slipped but the  
25X1 [redacted] NIE has slipped until the end of August.
- George assures me that our report will be ready for CIPC consideration in August.
- However, we can still have a CIPC meeting in July. The agenda will include:
  - Review and approval of an interim report to the DCI on NFIP Support to Contingency operations--one has been drafted.

25X1 These items would generate meaningful dialogue while keeping the committee actively meeting.

- 25X1 ● The Force Multiplier Working Group met on 14 July and finalized its TOR.

SUBJECT: Weekly Activities &amp; Status Report for the DD/ICS--16 July 1986

- 25X1 ● Ray is scheduled to meet with [ ] on 18 July at 1045 to discuss the study that Fred has undertaken on future collection technologies.

25X1 NFIP Support for Contingency Operations - [ ]

- 25X1 ● The working group held its last meeting on 1 July and will not meet again until it has a draft to consider. In the meantime, Paul and [ ] are reviewing the requested inputs--only a handful have been received as of 15 July--and preparing an interim report for CIPC consideration. They hope to complete the short interim report within the next few days and get quick coordination from the working group members before it is sent to the CIPC members preparatory for the CIPC meeting. Also, [ ] and [ ] will be out of the country next week on TDY.

25X1 CSEM - [ ]

- 25X1 ● [ ] completed programming the basic CSEM and some one dozen initial formats for reporting the outputs. The programming was developed on a small set of test data, and found to be performing all operations correctly.
- Technical difficulties (probably related to the Agency's NOMAD Program) prevented successful storage of the FIRF data needed to run the planned prototype demonstration, however, this problem is being worked on by CIA/OIT technicians.
- When we finally succeed in acquiring the FIRF data, this information will be supplemented as necessary by random numbers to generate a series of hypothetical reports to demonstrate the model's capabilities for CIPC management. Mark will continue to work on accomplishing this final step from a computer terminal at his present assignment.

25X1 Intelligence Support to SDI - [ ]

25X1 [ ] provided the SDI Working Group copies of all the Community responses to the D/ICS memorandum of 18 April. However, PPS is still awaiting responses from State, STIC and TTIC. Although many of our working group questions were not adequately addressed in the responses, Rich believes that he and [ ] will have enough raw material (particularly from the DoE, NSA, DIA, and CIA responses) to begin drafting a strawman after their 22 July working group meeting.
